3000 SERIES

Designed for Your Life. Guaranteed.™

Premium Vinyl

Replacement Windows

and Patio Doors

It's time to meet the window designed for your life. Welcome top-of-the-line energy efficiency – and all the money you'll save on energy bills. Embrace having more time to spend on the things you care about, rather than on scraping and painting old wood windows. Say hello to a brighter, more beautiful home.

We're Thermal Windows & Doors. In 1960, we created the very first custom-vinyl replacement window in America, and today we're pleased to bring our state-of-the-art windows to you, all backed by one of the strongest lifetime guarantees in the industry.

Introducing the 3000 Series, a replacement window that offers the features you want and the benefits you need.

Thermal Windows. **Designed for Your Life. Guaranteed.™**

3000 SERIES

Windows should brighten up your life, not complicate it. With vinyl windows from Thermal, you'll get top-of-the-line performance and energy efficiency – without ever having to scrape, sand or paint another window again.

Energy Efficiency

It's all in the name. Thermal Windows offers the very best in energy efficient features. Our warp-resistant vinyl, fully-welded frames and Peak Performance™ Glass options provide tight seals and exceptional insulation, so you'll have lower energy bills year-round.

Easy Care

We use the highest quality PVC vinyl in our windows, which means they'll never warp or need painting or refinishing. Tilt-in sashes and optional grids between the panes make cleaning even easier.

Environmentally Friendly

Greener is always better. PVC vinyl is a better option for the environment than many competing products. It emits less CO_2 and requires 20 percent less energy to produce than other plastics.

Fully Customizable

Choose from a wide range of enhancements and customizable options to make your windows fit any cosmetic, functional, style or budget requirement. With vinyl windows from Thermal, you can add custom shapes, internal grids, thermal upgrades and much more.

VINYL ADVANTAGES

Energy Savings

- **Dual-Glazed Insulating Glass with Warm-Edge Technology** enhances thermal performance
- **Dual Weather-Stripping** virtually eliminates air and water infiltration
- **Interlocking Sashes** reduce drafts

Built to Last

- **Solid Vinyl Construction** will not chip, peel or rot and never requires scraping or painting
- **Fusion-Welded Frame and Sashes** offer maximum strength
- **Multi-Chambered Construction** provides enhanced structural integrity
- **Fully-Welded and Weeped Sloped Sill with Rechanneling Leg** ensures quick runoff of water away from window and home

Life Made Easier

- **Lifetime Warranty on Vinyl and 30-Year Warranty on Insulating Glass** for peace of mind
- **Constant Force Balance System** offers easy, frictionless sash movement
- **Fiberglass Half Screen** is standard*
- **Extruded Lift Rails** ensure easy sash operation
- **Surface Mount Lock** offers peace of mind
- **Dual Night Latches** offer ventilation
- **Tilt Latches** make it easier to clean your windows

3000 FEATURES

Manufacturer reserves the right to substitute components as necessary.

Custom Shapes

Make your home your own with custom window shapes and bold architectural statements. From octagons to trapezoids, full circles to half rounds, we can build a window to fit your needs and specifications.

Peak Performance™ Glass

Our Peak Performance Glass system is a dual-pane insulating glass system that combines one lite of high performance Low-E Glass and one lite of clear glass for a U-value of 0.30. Enhancing the air space between the two lites with insulating Argon gas allows these windows to meet ENERGY STAR criteria. Consider the Peak Performance Eco Glass system which combines one lite of high-performance triple coat Low-E Glass and one lite of clear glass, for climates where solar control is important.
